

# Asset Management Technology Solutions

*By The BIM Engineers*

# About us

We are a multinational, multidisciplinary and full-service BIM company. We operate in the innovative and revolutionary changing field of design and engineering, construction, installation and infrastructure across the globe. We add value through our excellent BIM knowledge and experience, capacity and innovation.

# Services

# Reference projects

## Airports

- Heathrow International Airport Terminal 5 Extn.
- Dial- Indira Gandhi International
- Nmial - Navi Mumbai International Airport
- Chennai International Airport
- Singapore Changi 4 The Jewel Airport
- Schiphol Airport
- Hong Kong Airport

## Railway/Metro

- Ghatkopar Metro Station
- Duhai Metro Station
- Tai Seng Facility Building
- Guldhar Metro Station
- Asi Metro Station
- Chennai International Airport Metro Station
- West Kowloon Metro Station
- Mass Rapid Transit Station
- Euston Station
- Delhi Metro Rail Corporation
- Patna Mass Rapid Transit System

## Healthcare / Mixed

- Nyt Ouh –New University Hospital Denmark
- New Malmo Hospital Sweden
- Ikea Furniture Stores Us
- Ikea Furniture Stores India
- New Garda Police Hq Ireland

## Industrial / Plant

- Pyhäjok Nuclear Power Plant Finland
- Nxtra Data Centre Sri Lanka
- Airtel Data Centre India

THE **BIM** / ENGINEERS

**Speciality**

Reference key projects

# Technology expertise

# Scan to BIM

From the scanning part,  
all the way to the final  
BIM model, we cover all

# Scanning methods

Standalone scanners

Mobile Lidar mapping

Drone scanners

Handheld scanners

iPhone Lidar scanners

Manual measurements

# Specialized equipment

- Primary scanner **RTC360**
  - This is what we would use for most of our as-built MEP work.
- Alternate Scanner/total station (Used for mainly exterior)
  - **Leica Nova MS60 MultiStation**, GNSS connectivity and digital imaging, they say it is the highest-end total station available. Scanning speed of up to 30.000 points per second, allows you to compare 3D visualisations of measurements to reference surfaces or even DXF/ICF models.
- **Matterport Pro2/Ricoh Theta Z1 360 Camera**
- **GNSS/GPS EQUIPMENT** and access to the **Lecia Pegasus Backpack**
- Aerial photogrammetry and surveying, our drone fleet includes
  - DJI Phantom 4 Agriculture & Surveying
  - DJI M210 RTK Inspection, Public Safety, Renewables, Surveying
  - Inspire 1&2 - Filming & Surveying
- **Elios 2** - Indoor drone for confined space inspections

# Specialized equipment

- **Leica RTC360** - 3D Reality Capture Solution (MEP)
- **Leica Cyclone** - FIELD 360 software (MEP)
- **Leica Pegasus** - Backpack Mobile Mapping Trailer
- **Leica Nova MS60** - Topography and as built check (External)
- **DJI Matrice 210 RTK drone** - aerial photogrammetry & Survey
- **Elios 2** - Indoor drone for confined space inspections

# Redefining As-Builts

## with the RTC360 Laser Scanner

Since welcoming a new member of the team, the RTC360 laser scanner. We have had a high demand for clients using our laser scanning services to save them time and money.

The RTC360 laser scanner. It's a substantial improvement over other approaches to produce as-builts and verify existing conditions.

Our scanning processes are easily achieving a 60+ %-time savings and can deliver information the architects and engineers can work from the very next day. Therefore, giving them a huge advantage in overall production.

# Transforming Turnarond

## With in-field registration

With most laser scanners, the point cloud data from the scans then need to be aligned or registered in the office before it can be ex-ported to a useful deliverable.

As part of our scanning solutions using the RTC360, the Cyclone FIELD 360 app links the 3D data acquisition in the field with the laser scanner and data registration in the office with Cyclone REGISTER 360.

On-site, we can automatically capture, register and examine scan and image data. The user interface combines easy handling of complex calculations with a graphical user guidance that offers a remarkable experience.

# 3D modelling for MEP Spatial Analysis

Laser scanning & 3D modelling of a brewing plant for spatial analysis.

## Overview

On-site, we can automatically capture, register and examine scan and image data.

The user interface combines easy handling of complex calculations with a graphical user guidance that offers a remarkable experience.

# Laser Scanning for MEP

Leica RTC360

# Exterior Scanning

## with LIDAR and Drone Photogrammetry

We are often able to deploy a combination of principal technologies to seize the 3D data.

- Carry out site inspections prior to construction starts
- Structural inspections without the need for human labor
- Progressive point cloud scanning
- Aerial photographs throughout the build progression
- Close eye on-site activity to ensure safety and progression
- Project Completion inspections
- Meeting government regulations
- Merging of ground and aerial data to create a full 3D point cloud model

Issues automatically generated per element

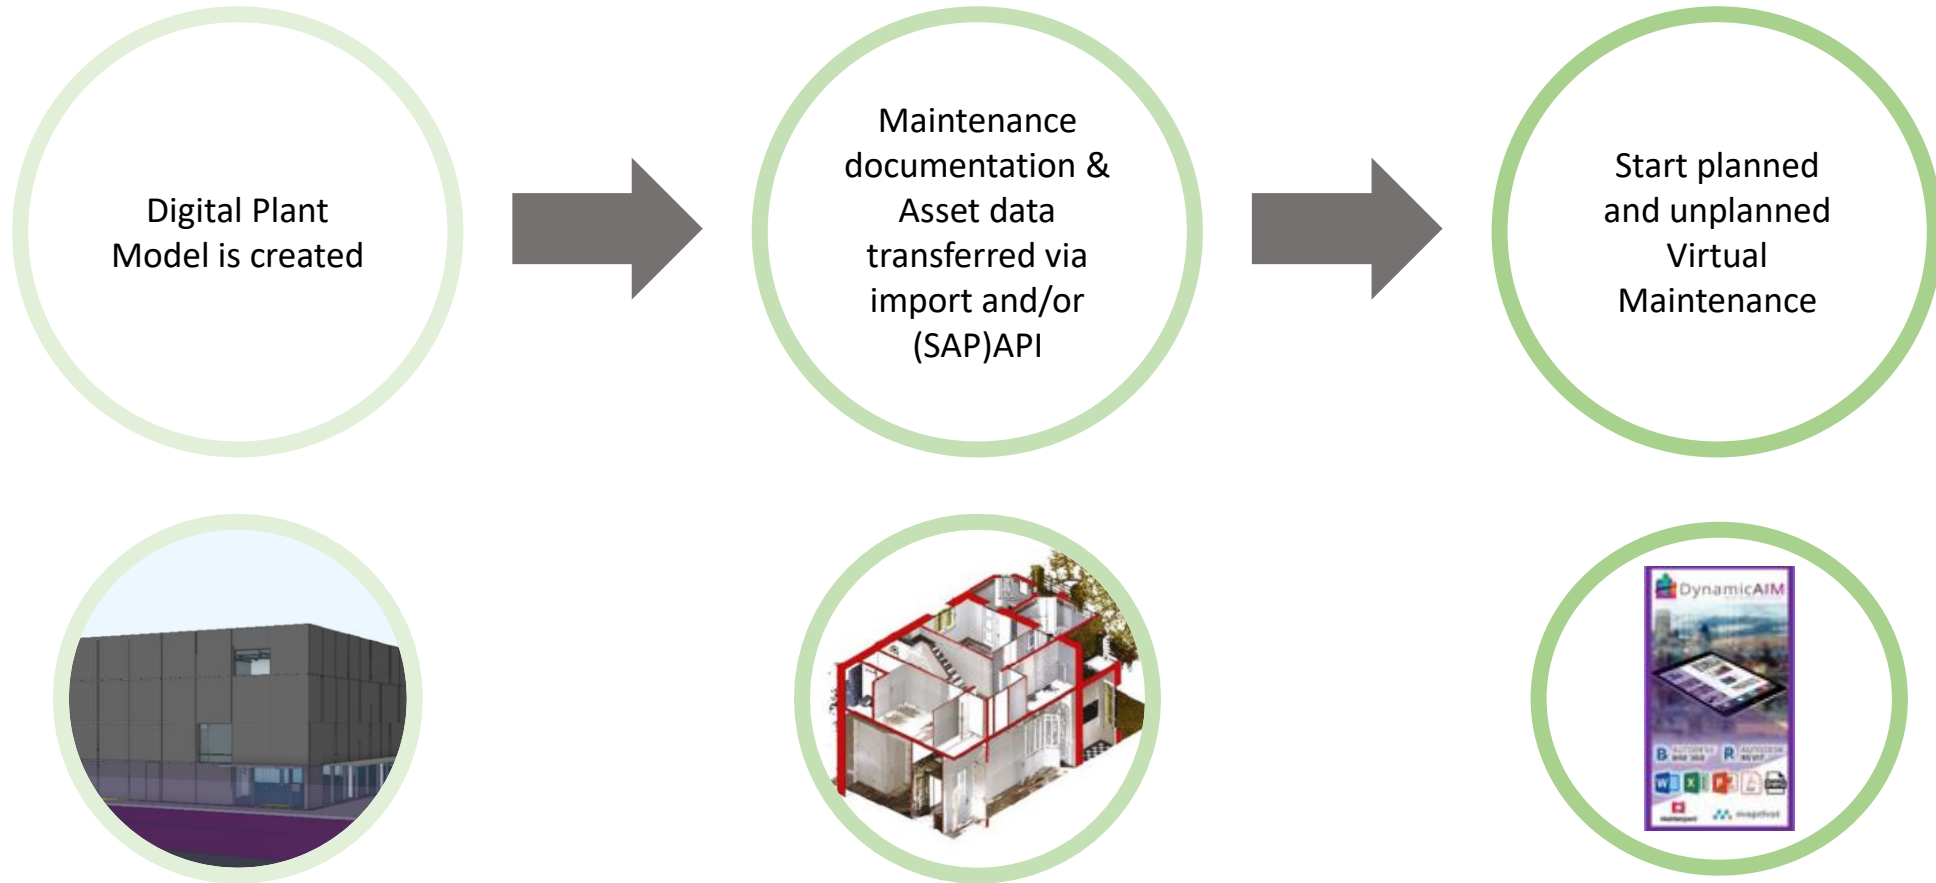

# Process integration

Digital twin (including Facility Management)

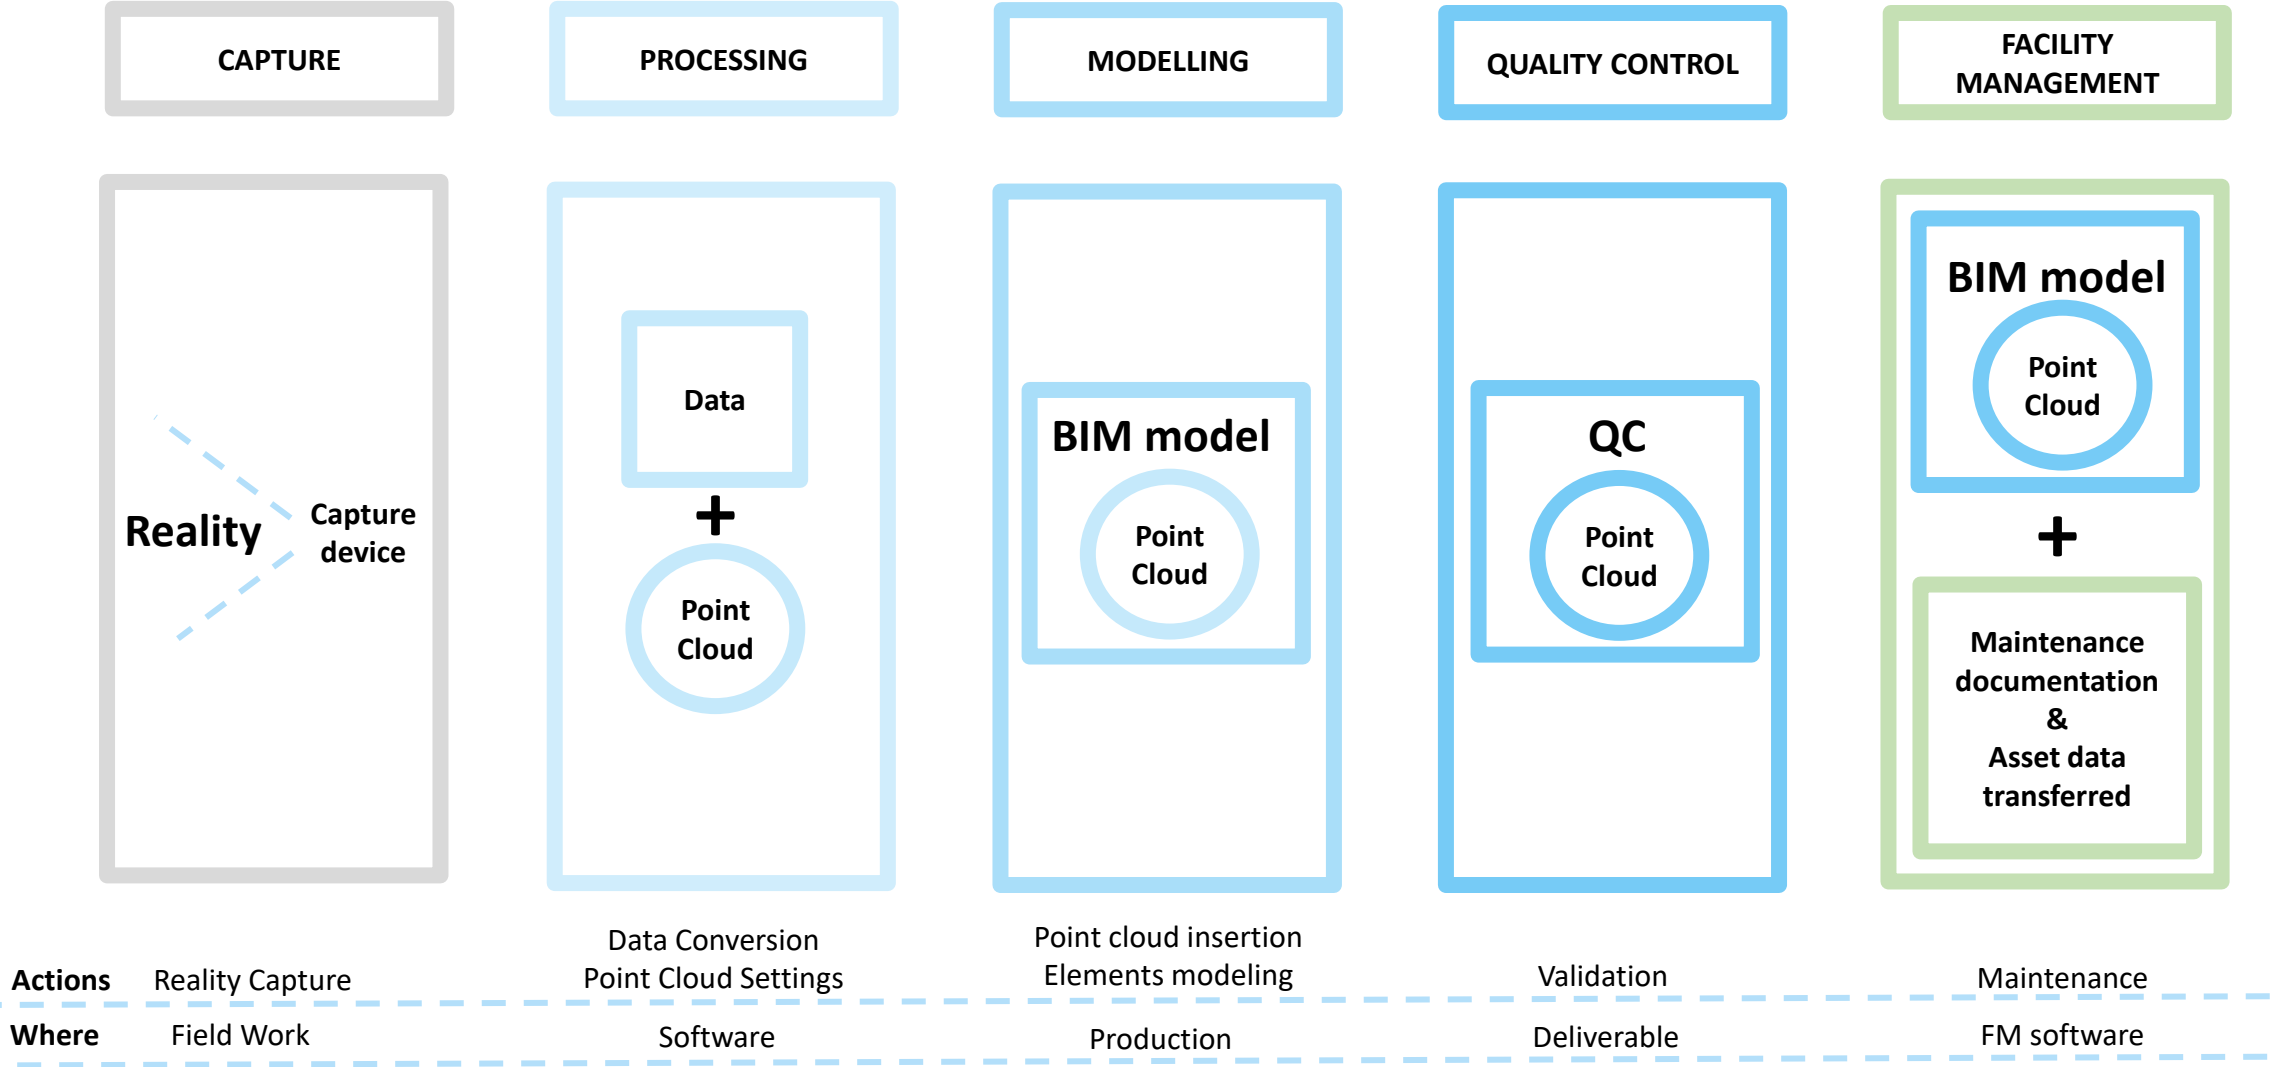

# Process integration

Digital twin (including Facility Management)

# Process integration

Digital twin (including Facility Management)

# One-stop-shop

Where do you benefit?

## Input formats

- As built model based on point cloud
- All necessary parameters included immediately
- PDF drawings to BIM
- Manual survey/measurements to BIM

Facility Management  
Data Integration  
Digital Twin/Digital  
Facilities Management

## BIM based maintenance for end users

- Up-to-date BIM models, 2D drawings, documents
- Complete overview of assets and spaces
- Innovative product
  - QR-codes on assets
  - 360 degrees images
  - Point clouds
- 100% Tablet support
  - Access to models, drawings, assets
  - Workorders and workorder history

DynamicAIM

From site...to building...to room...to asset...

# Facility Management

## The solution

BIM & Documentation (Digital twin)

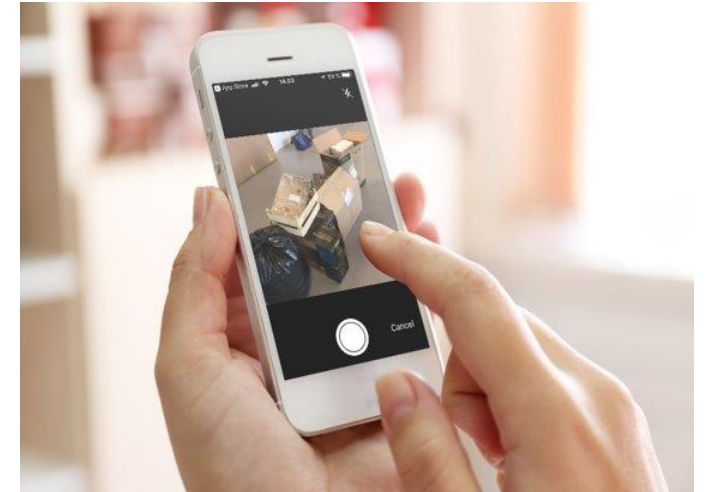

All data for your buildings in one system

Operation & Maintenance

Mobile and BIM-based maintenance

User Friendly FM

User-friendly and efficient FM

# One-stop-shop

Where does your business benefit?

“ The Asset Information Model or AIM for short, is a term used to describe the collated set of information gathered from all sources that supports the ongoing management of an asset”

This process is set out in detail in the UK BIM Standards.

***In other words, DynamicAIM is a place for Digital Stuff.***

# One-stop-shop

DynamicAIM

From site....to building....to room....to asset....

## Our BIM to FM process

Cadline surveyors attend site and conduct 3D Photo & BIM Scans capturing your physical Assets within DynamicAIM at the coalface.

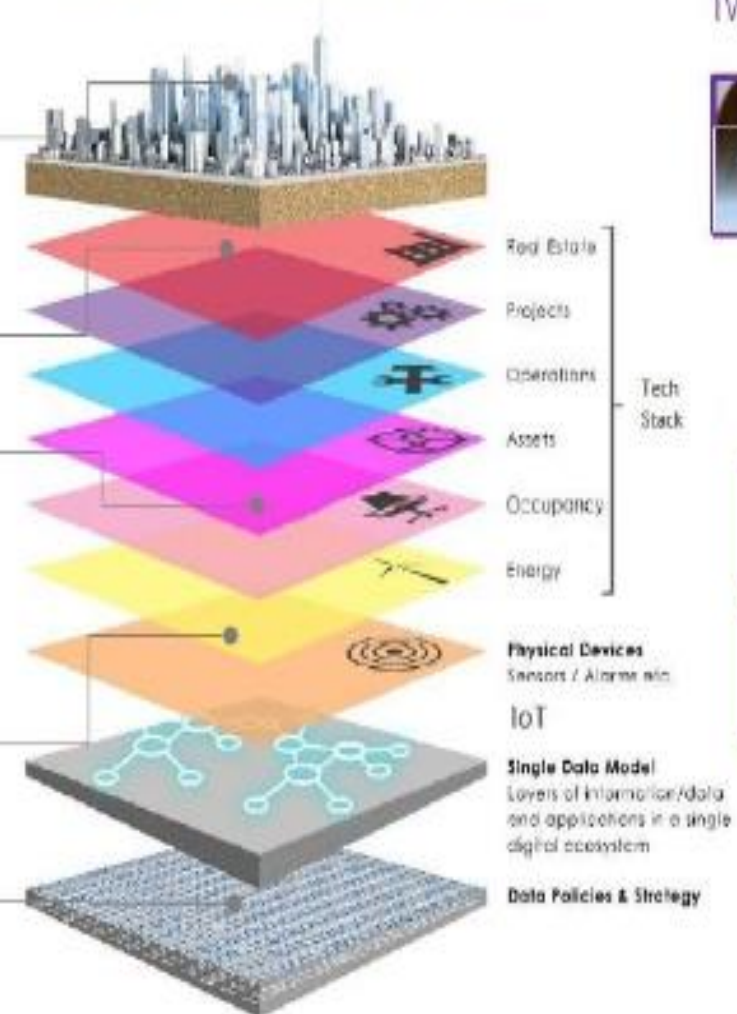

## Our BIM Data Connector

Take Control.....

Compliance, Asset Information, Condition, key documents at your finger-tips for rapid decision making and proof of concept in 3D.

## Your Digital Technology Stack

## PAMS/CAFM IWMS/CRE/CMMS

## Digital Analytics

# live demo

# Business Benefits.

- **Visit sites & assets virtually** from your computer or device.
- Find correct asset data **quickly**, in **one place**.
- **Navigate** down to any level of assets & easily use measurement tools.
- Dynamic **O&M** system.
- No need for native **CAD** software.
- No expensive **training** & adoption curve.
- Talks to **existing Asset & CAFM** systems.
- Storage is **managed**.
- You own your **data**.
- Dashboard & **Reporting** functionality bolt-on.

# BIM Project Savings

**£200M Project**  
**10% Savings due to BIM process**

United Utilities created a 3D model in the concept and definition phases, which was used as a template for the detailed design. However, the CAD team, led by Matt Lees, Cadline's BIM specialist, then decided to create a model from scratch.

Design collaboration.  
Multi Disciplined  
federated models prior  
install.  
Clash Prevention.  
Once source of truth.  
Scheme completed  
ahead of deadline.

# Scan to BIM Adoption

## *centrica*

### **Scan to BIM Modelling - Training Program.**

Purchasing Equipment with Cadline's trade specialists.

Elbow support during transition & adoption.

On going Customer Support contracts.

Future proof on-going training for latest equipment features & software for continued innovative adoption.

# Security

- Hosted on **AZURE** server (Microsoft).
- Detect threats **early** with unique **intelligence**.
- **Backed up daily**, no loss of data.
- **Ransomware resistant**, theft proof.
- Cadline working to **ISO 27001** - Security best practice.

# Testimonial

*"The Cadline Engineering Services  
team exceed expectations."*

"As our 'go to' 3D survey & BIM supplier, the Cadline Engineering Services team exceed expectations. DynamicAIM helps us digitise our stock and centralise data whilst working towards conforming to the Hackitt report & new government guideline."

– Asset Management – Peabody Trust

# Quality assurance
